

Ball Car, BB8's Brother

BY TREVOR CRAIG

Controls and Electronics

- ▶ Arduino
- ▶ Official Arduino Motor Shield R3
- ▶ XBEE -> Serial Control
- ▶ Motors (300 RPM 12V) .6A no load
 - ▶ RPM LIMITED!!!
- ▶ Standard Servo (5.5 kg-cm)/76 oz-in
- ▶ Joystick Controlled

BOM

| Part | Price | Quantity | Total |
|------------------|-------|----------|----------|
| J oystick | 5.95 | 1 | 5.95 |
| Servo | 12 | 1 | 12 |
| Motors | 12.76 | 2 | 25.52 |
| Arduino | 24.95 | 1 | 24.95 |
| Arduino Pro Mini | 9.95 | 1 | 9.95 |
| Power Boost | 19.95 | 1 | 19.95 |
| Lithium Ion | 14.95 | 1 | 14.95 |
| Lithium Polymer | 27.99 | 1 | 27.99 |
| Total Cost | | | \$141.26 |

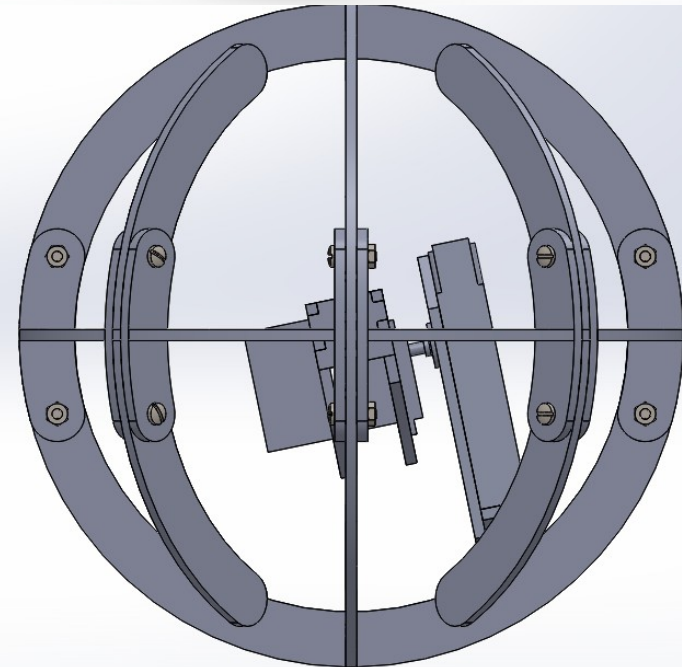

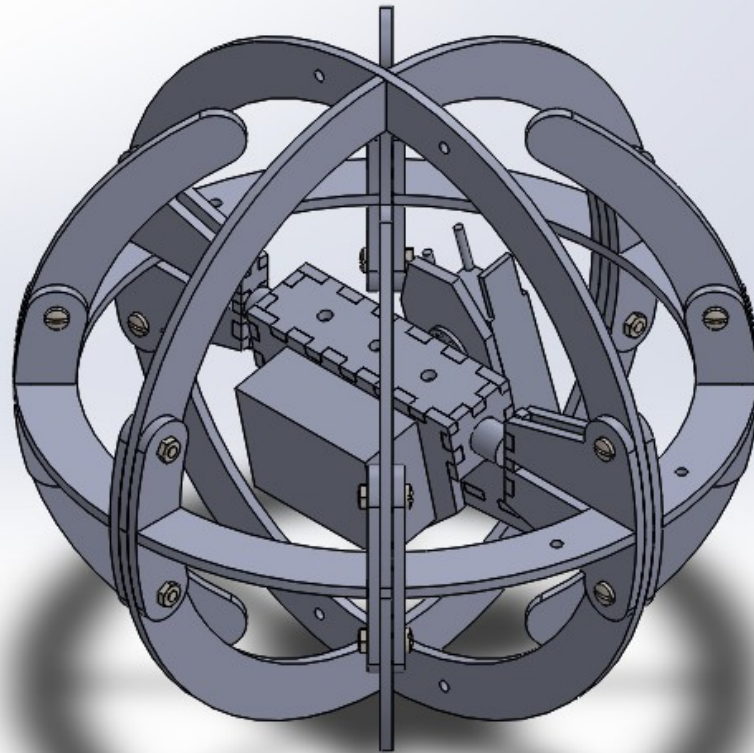

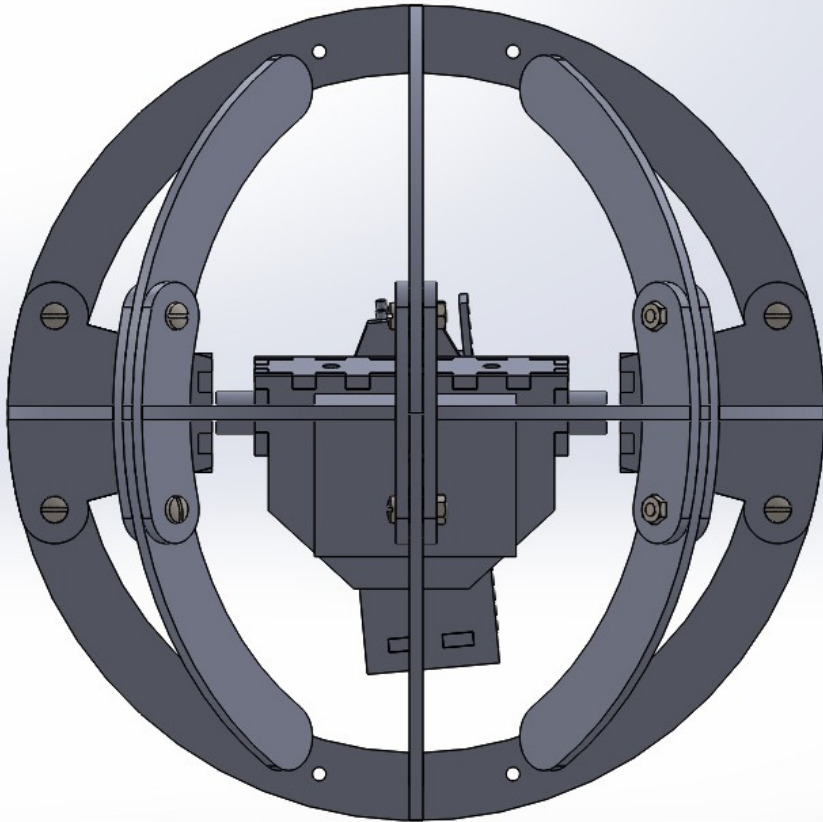

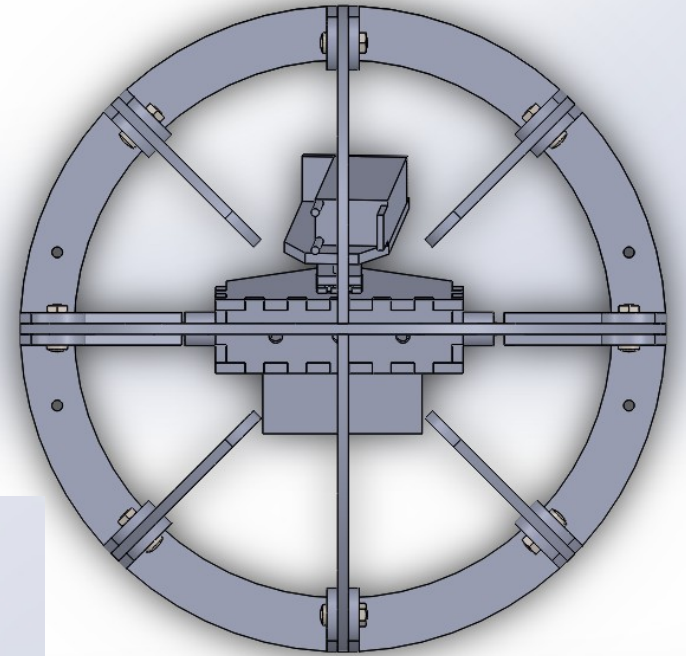

| Part | Price | Quantity | Total |
|------------|-------|----------|--------|
| Wood | 6.15 | 1 | 6.15 |
| Nuts | 0.08 | 16 | 1.28 |
| Bolts | 0.08 | 16 | 1.28 |
| Total Cost | | | \$8.71 |

TOTAL COST=\$149.97

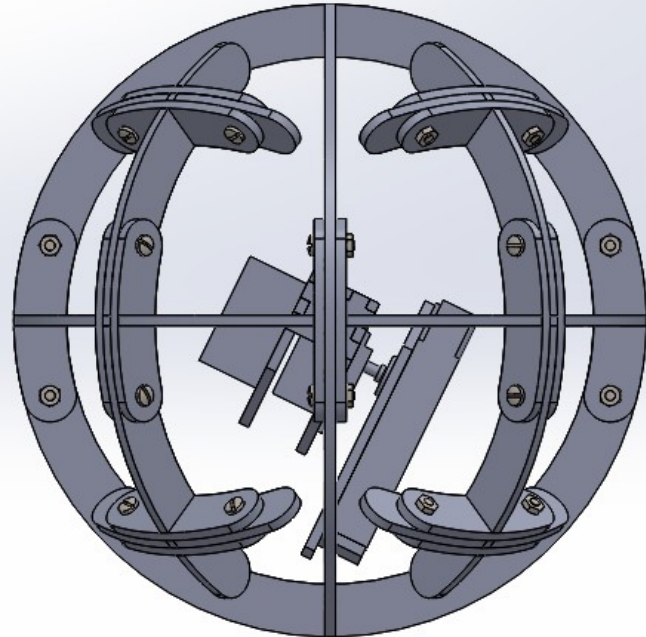

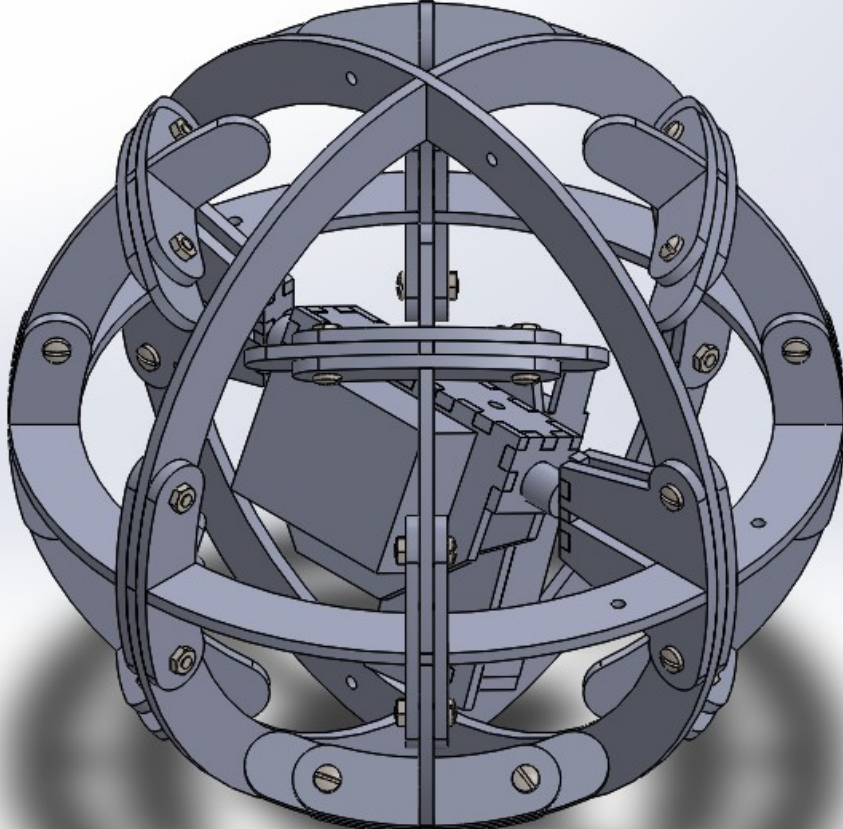

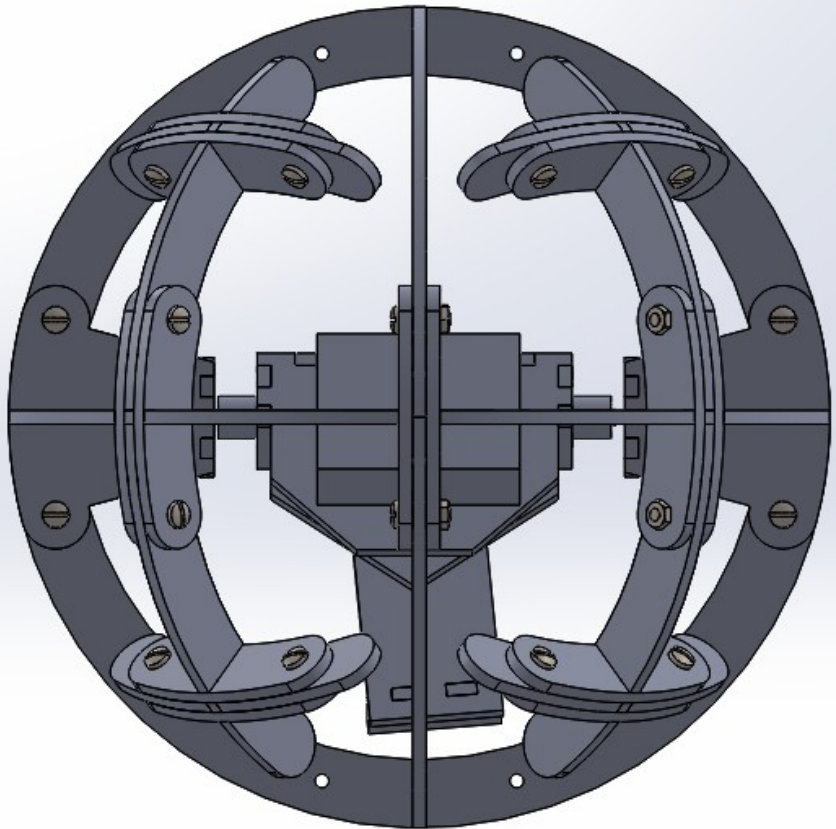

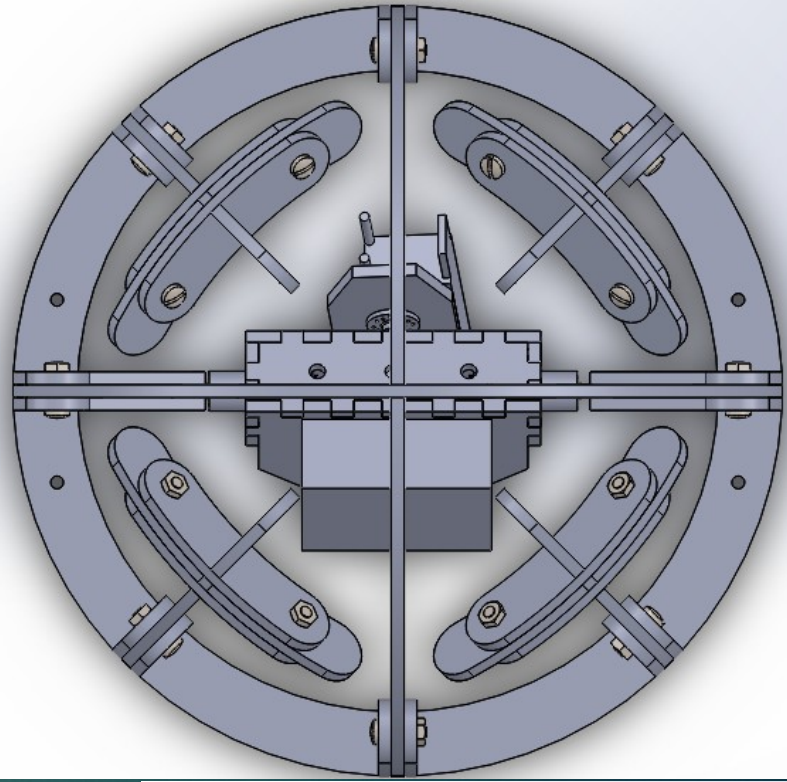

Sphero BB8
\$150.00

Design 1

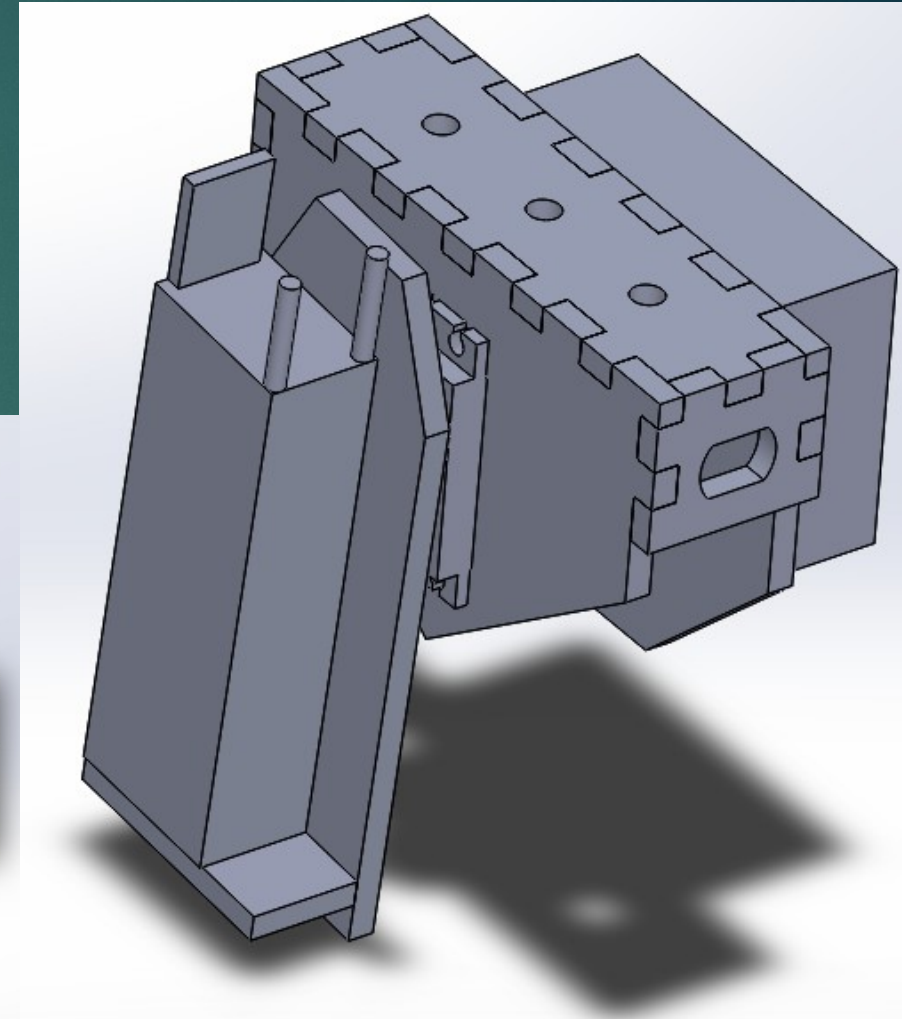

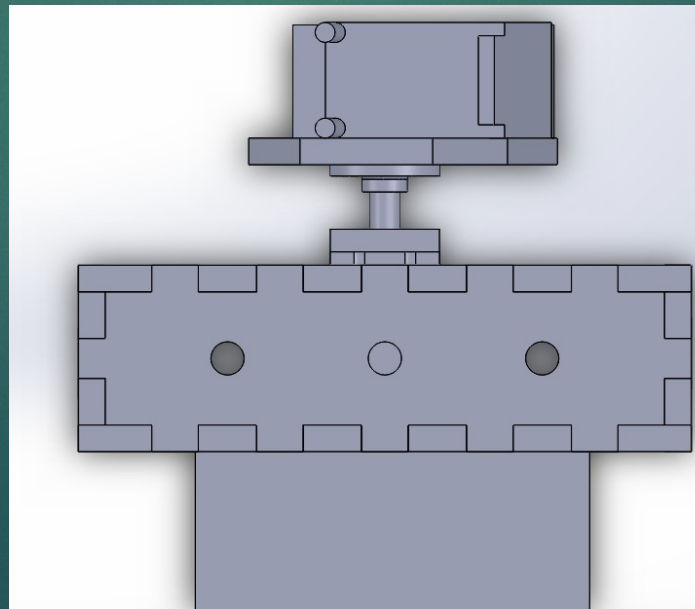

Design 2

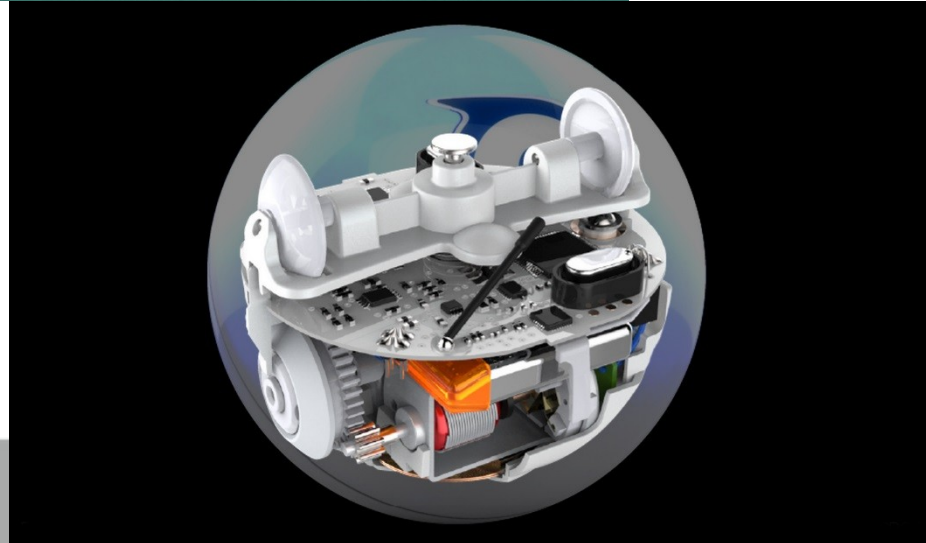

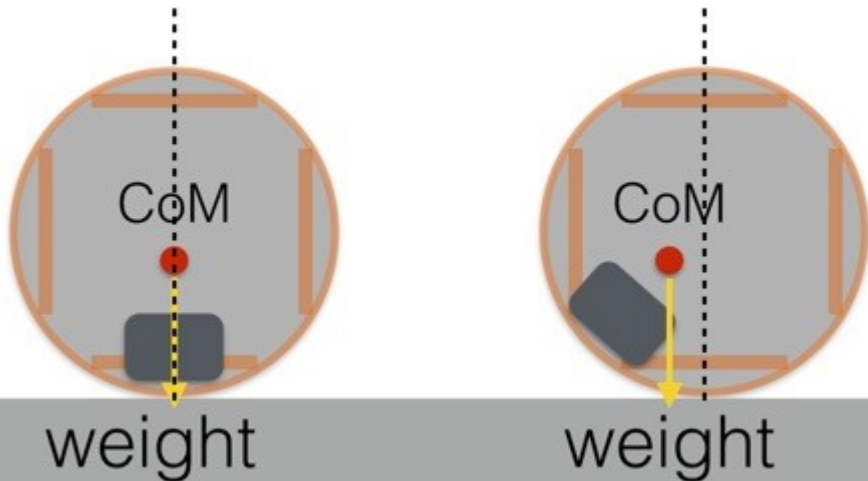

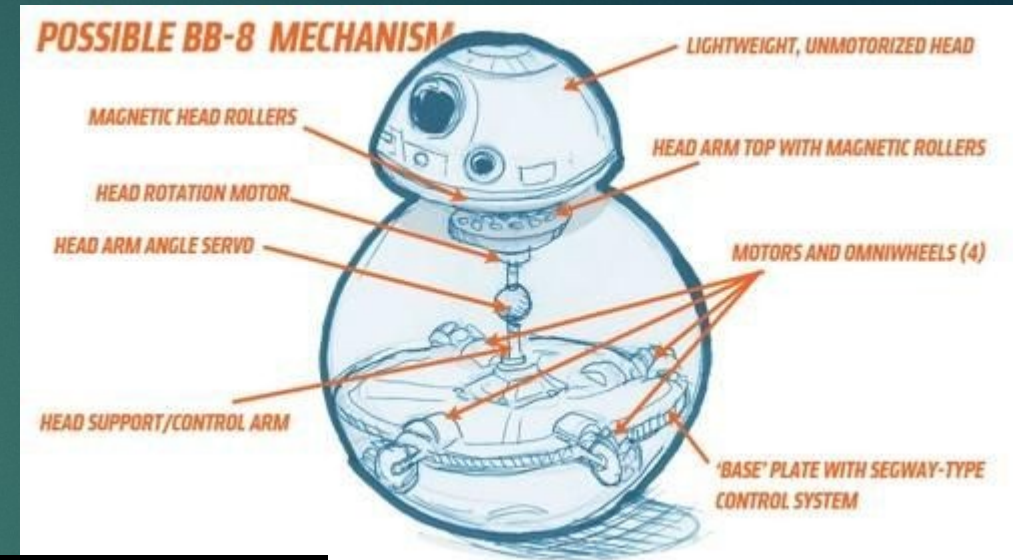

Carriage Advantage

- ▶ Modular Components
 - ▶ Easy Replacement
 - ▶ Easy Iterations
 - ▶ Could be placed in different sized Balls

What does Sphero and BB8 do?

- ▶ Remote control car in a ball
- ▶ I did weight shifting to move the Center of Mass
- ▶ Which is more interesting?

Future Work

- ▶ Make Large Frame
- ▶ Add accelerometers and a gyroscope
- ▶ Limit servo jitters
- ▶ Add a small speaker to give it some attitude!
- ▶ Also needs a Name
